Mini Project

Identify a domain area of your interest for doing data analysis and machine learning. Search for relevant data in the internet. Data can be csv, text, excel or similar formats. Do exploratory data analysis on the data by doing the following

a) Import the data into R variables (preferably data frame).
b) Represent the data using suitable graphs.
c) Find out statistical information like Mean, sd etc.
d) Find the correlation between a dependent column and all other columns.
